How to adjust the brightness on a Computer or Laptop

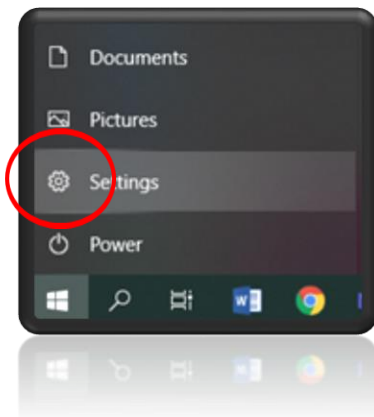

Step 1 –

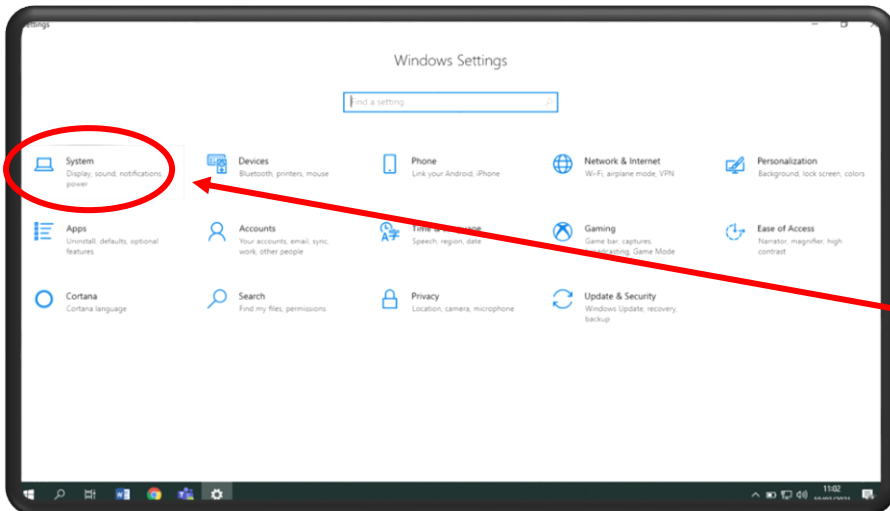

Click on to the windows start icon at the bottom of the page.

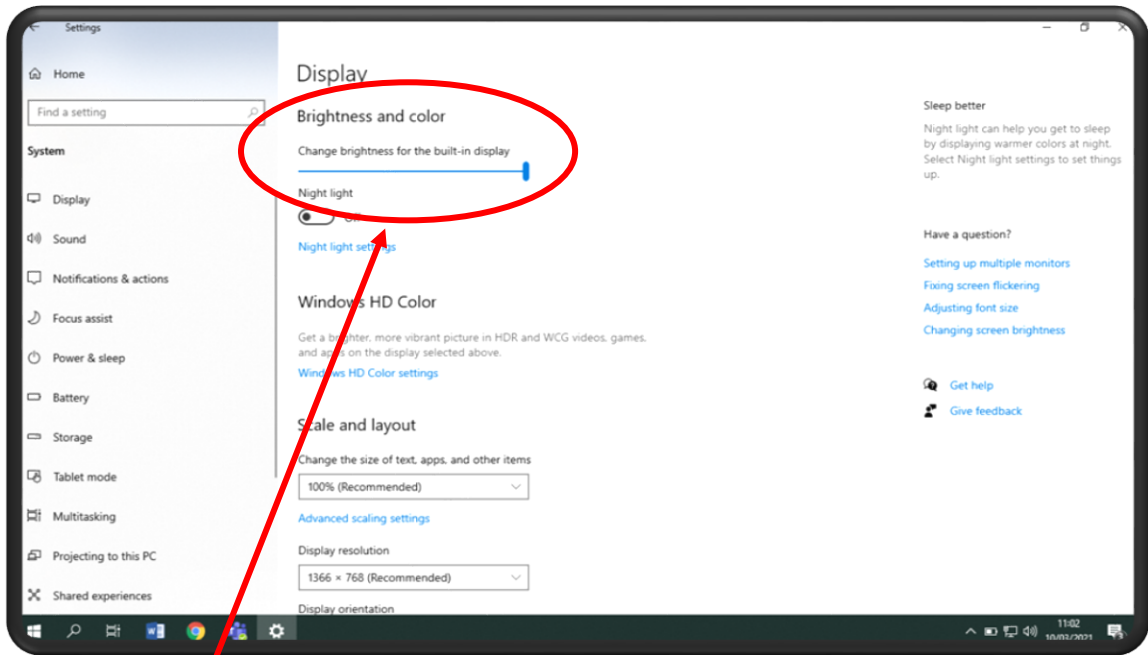

Step 2 –

Click on the settings icon.

Step 3 –
This page will appear, click on to the system section.

Step 4 –
This page will appear.
To adjust the brightness just click onto the brightness bar and drag right or left to change the brightness.
Once you are doing this the screen will adjust. Set the adjustment to what is best for you.
